SKILLS

LANGUAGES & FRAMEWORKS

TypeScript · React · Next.js · HTML/CSS · Tailwind CSS · Node.js · C# · .NET · SQL · Python · R

CLOUD & TOOLING

Azure · Terraform · Datadog · Git

WAYS OF WORKING

Microservices · Spec-driven development · Automated testing · Code review

EDUCATION

Certificate, Full-Stack Web Development
CareerFoundry
09.2022 – 02.2023

M.Sc. Experimental and Clinical Linguistics
University of Potsdam
04.2013 – 06.2016

B.A. Biological Sciences and English
Flinders University, Australia
01.2007 – 12.2009

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals
Microsoft, 08.2026

Python for Data Science
IBM, 12.2017

LANGUAGES

English: Native
German: Professional working
Spanish: Limited working

ABOUT ME

Berlin-based software engineer with three years of full-stack experience at Enpal, building the internal systems behind 20k+ contracts and 75k+ sales presentations a month. A background in technical writing, data science, research and working towards founding a start-up means I put users first and communicate clearly.

EXPERIENCE

Software Engineer | Enpal

08.2023 – 11.2026 Berlin, Germany

Contracting & Presentations team. Promoted twice in 15 months: Full-stack Developer Intern (08.2023), Junior Software Engineer (02.2024), Software Engineer (11.2024).

- Developed and maintained the team's microservices and connected them with other teams' services, integrating their internal APIs to make our systems CRM-agnostic; set up Datadog monitors, alerts and dashboards.
- Co-led the technical side of a greenfield internal tool replacing Airtable for the KYC team ahead of a hard contract deadline; drove UI/UX and shaped technical decisions; delivered the MVP ahead of schedule in ~8 weeks.
- Designed and built an asset library (backend, UI, Azure Blob Storage with short-lived SAS tokens) that let presentation managers upload images and use them conditionally in templates. Sales presentations used by hundreds of sales staff could then adapt to a wider product range.
- Started a tech-debt backlog and fortnightly refinement; onboarding buddy for 10 new joiners; presented the team's work in quarterly demos to ~250 colleagues.

Founding Team | SumOne

11.2020 – 09.2022 Brandenburg, Germany

- Worked towards founding a digital-health start-up on an EXIST start-up grant, making hospital information-system data easier to use on the ward.
- Led a UX concept project with an external UX agency; designed and developed the company website; introduced a clearer approach to strategy and regular employee check-ins.

EARLIER EXPERIENCE

Frontend Web Developer and Content | Artificial Artist 12.2021 – 06.2022
Developed and tested an early iteration of the website to shape UX strategy; created marketing content.

Technical Content Writer | Acrolinx (now Markup AI) 01.2018 – 10.2020
Migrated the product docs from Zendesk to Confluence; built automated tests that scored the published docs with Acrolinx's own products, feeding results back into the product; implemented in-app tutorials; streamlined in-app string translation.

Data Scientist | EIDU 11.2016 – 11.2017
Tested the effects of deep-neural-network curriculum generation on curriculum quality; planned robust testing of transfer learning.

Research roles | Charité, Uni Potsdam, FU Berlin, BodyInMind 2012 – 2016
Psychophysics, eye-tracking modelling and EEG analysis; first author, *Scientific Reports* (2017).
